## Systematic review enquiry on:

### **EN 14475** : 2006 "Execution of special geotechnical works - Reinforced fill"

#### COMMENTARIES

For remind, there has been a minor change in CEN procedure concerning the launch of the systematic review : from 1<sup>st</sup> July 2015, as per decision BT decision BT 36/2014, CCMC implements the systematic centralized EN review. As of 2015-07-01, all reviews of ENs are handled via this centralized system.

During the CEN/TC 288 meeting held in Stockholm on June 2015, TC members decided to continue to take Decisions concerning systematic reviews during plenary meetings.

Following decision 173 taken at the CEN/TC 288 meeting held in Stockholm on 25/26 June 2015, **CEN/TC 288 decided to ask an earlier start of the review before the normal five-year trigger for EN 14475:2006 so that the Decision on this systematic review could be taken during the next CEN/TC 288 plenary meeting scheduled in June 2016.**

So CCMC has launched the systematic review on the EN 14475 on 2015-10-15. This enquiry will be closed on 2016-03-15.

Replies are to be made on the CEN Electronic Balloting for SR. CEN Member Bodies have to express their opinion to confirm or to revise this standard.
