

- 1 Existing
- 2 New

Clients & Consultants & Main contractors Include investors and legislators				EFFC Membership - Geotechnical Contractors				Supply Chain					
Economical	Social	Technical	Environmental	Economical	Social	Technical	Environmental	Economical	Social	Technical	Environmental		
Business ethics				Young Talent				Materials					
- Cash neutral payment practices	1			- How to attract to the industry (what motivates/drives them?)	1	2	2	2	- Low carbon concrete	1		2	2
- collaborative working (especially for digital construction)	1		2	- New digital skills and training			2		- Steel supply	1		2	2
- Uncapped liabilities	2			BIM uptake	1		2		Energy supply	1		2	
Ensuring market futurity and economic growth	2			- Lifelong learning					Ensure policies and actions for: human slavery, anti-bribery, bullying & harassment, equal opportunities		1		
Anti-corruption		2		Project issues				Reducing transport distances					
Legal and business compliance	1			- Noise reduction	1		2	2	Reducing transport impacts (e.g. congestion)			2	2
Project issues				Water pollution prevention				Sustainable resource extraction					
- safety co-ordination and planning	2	1		Air particulate reduction			2	1	Supply chain traceability			2	2
- Safe working platforms		1		- Working hours	1	2			Raising awareness of sustainability	1			
- GI data			1	- Drug & Alcohol testing			1		Ensuring product quality	2		1	2
stakeholder / community engagement	1	2	2	- Occupational health monitoring			1	2	- biodegradable lubricants and hydraulic oil			1	1
Stakeholder collaboration		1	2	- mental health			2		- groundwater-compatible grout / injection mat.	1		2	2
Client and contractor awareness of different solutions offered	1	2	2	- Silica dust exposure				1	- new machines come with particle filter	1		2	2
Preventing overengineering in clients specification	1		2	Stress	2	1			Sustainable supply chains				
Earlier subcontractor engagement	2		2	Anti-discrimination and harassment	2	1			Working conditions and human rights (slave and forced labour, child labour, right to assembly/collective bargaining, fair wages etc)		1		
Raising awareness of more sustainable techniques			2	Transport and congestion	1		2	2	Equality and Diversity				
Identifying clients sustainability priorities			2	Equality & Diversity				Environmental aspects					
Encourage life cycle thinking	2		2	- Shift patterns	1	2			Business ethics (corruption etc)		2		
Wider stakeholder collaboration				Education?				Capacity building					
Legislative influence & anticipation (via FIEC)			2	Disruptive innovation				Health and Safety					
Non-government organisations (NGO) influence			2	- Digital construction			1	2			1		
Investment community				- Automation	2			2					
Priorities for sustainability and how geotech. can meet these			2	- Artificial intelligence	2			2					
Encouraging research and development	2		2	Ensuring market futurity and economic growth	2			1
